

For best results:

MAKE SURE FEET ARE DRY AND ALLOW THEM TO AIR OUT OF YOUR SHOES AND SOCKS FOR AT LEAST ONE-HALF HOUR BEFORE APPLYING T.I.P.S.™ TOE NAIL CONDITIONER. USE THIS TIME TO GENTLY MASSAGE YOUR FEET. A RIBBED FOOT ROLLER IS AN EXCELLENT WAY TO MASSAGE TIRED FEET. THE INCREASED CIRCULATION THAT THE MASSAGE ACHIEVES WILL BENEFIT YOUR TOE NAILS WHILE IT REMOVES THE BUILT UP TENSION IN YOUR FEET, LEAVING YOUR FEET FEELING RELAXED AND REFRESHED.

FOR EXTREME CASES, WHERE YOU TYPICALLY WEAR SHOES OR BOOTS ALL DAY LONG, IT MAY BE NECESSARY TO CONTINUE WITH DAILY APPLICATIONS.

THE INGREDIENTS FOUND IN FOOT CREAMS AND LOTIONS MAY FORM A BARRIER ON THE SURFACE OF SKIN AND NAILS REDUCING THE EFFECTIVENESS OF T.I.P.S. TOE NAIL CONDITIONER. AVOID THE TOE NAIL AND CUTICLE AREA WHEN APPLYING THESE CREAMS.

YOU SHOULD ALWAYS CUT YOUR TOE NAILS STRAIGHT ACROSS SO THAT THE SIDE EDGES OF THE NAILS ARE VISIBLE AND HAVE NOT BEEN ENCOURAGED TO DIG UNDER THE SKIN FOLD. TIGHT SHOES, STOCKINGS AND SOCKS CAN ALSO CONTRIBUTE TO THE PROBLEM OF INGROWN TOE NAILS BY PRESSING ON THE NAIL AND SKIN AT THE EDGE.

# Benefits of T.I.P.S. Toe Nail Care...

In our daily routine, our feet are exposed to a great deal of heat, dampness and humidity. A typical pair of feet will release nearly a cup of moisture a day. This moisture contains salt, which is very drying and irritating to the skin, nail and cuticle. These factors compound to make toe nails dry, weak, rough and brittle. Clinical studies have shown that chronic exposure to moisture increases the incidence of brittleness in nails.

T.I.P.S. Toe Nail Conditioner is specially formulated to transform your cracked, dry, peeling nails into strong, beautiful nails. T.I.P.S. Toe Nail Conditioner provides the nail and cuticle with beneficial natural ingredients, inhibiting the absorption of damaging substances that bombard the nail structure daily.

Results vary with different users but within weeks of commencing daily Toe Nail Conditioner applications, you should begin to see a marked improvement in the texture and condition of your nails and cuticles. Your nails will become more flexible and less vulnerable to chipping, cracking and splitting.

Do not use any other application, specifically nail hardener type polishes, fiber reinforced polishes, buffing and shining pads, etc. with T.I.P.S. Toe Nail Conditioner. Any polishes or similar products that dry on the nail surface, robbing the nail of vital oils, should also be avoided. All buffing and shining pads cause irritation to the cuticle and remove surface layers of your nails, making your nails thinner and more prone to breakage. Strong, healthy-looking, natural nails are beautiful all by themselves. Show off their natural beauty by not covering them with polish. Used as directed, T.I.P.S. Toe Nail Conditioner will help you to have the strong, beautiful, healthy-looking toes nails you have always wanted, naturally.

T.I.P.S. Toe Nail Conditioner helps restore the cuticle to a natural, healthy-looking state. Well-conditioned cuticles are essential for strong, beautiful, healthy-looking nails. With T.I.P.S. Toe Nails Conditioner you will notice that your cuticles will feel softer and appear less pronounced.

Pushing back or cutting the cuticle is a harmful practice that allows bacteria and chemicals to damage the nail producing tissue. For these reasons, never allow your cuticles to be trimmed or pushed back. Toenails should be cut and filed to a square tip shape in order to prevent ingrown toenails. You may continue to use toe nail polish after an initial 2 to 3 week period but avoid using polish too close to the cuticle. You may apply Toe Nail Conditioner to the cuticle and underside surface of nails daily without removing your toe nail polish. If you wear polish regularly, treat your toe nails every time you remove your polish (remember to wash and dry toe nails thoroughly before application).

Apply one coat of T.I.P.S. Toe Nail Conditioner to the entire nail surface, underneath the nail tip, the cuticle area and on any dry or cracked skin around the nail. T.I.P.S. Toe Nail Conditioner will not dry on the surface of the nail, but will be gradually absorbed. Any remaining T.I.P.S. Toe Nail Conditioner may be removed using a tissue or simply rub it in like foot cream. Repeat daily for two to three weeks then reduce the applications to two or three times per week.

Always apply T.I.P.S. Toe Nail Conditioner to toes before cutting or filing the toe nail. Cut toe nails straight across (square shaped nail tip), and leave only slightly shorter than the end of the toe.

## SHAKE BEFORE USING

There may be some settling of ingredients. This is normal and does not affect the product.

## CAUTION :

- FOR EXTERNAL USE ONLY
- KEEP PRODUCTS SAFELY OUT OF THE REACH OF CHILDREN
- STORE LIQUID IN A COOL, DRY PLACE
- CLIPPERS MAY BE SHARP
